

Dear Ms. Ping,

My name is Ng Huynh Vu Ngan, I am so lucky and grateful to receive your help. This is not just about a material thing, but also emotionally and in my spirit to help me go through a difficult time right now. Dear friend, I was born in a family from a very hard life. My father was a farmer and his income was not enough to support us. The harvest every year was very bad so the family depended on my mother who did not make a lot either. Unfortunately last year my mom was diagnosed with bone cancer and she needed money to help her with her sickness. Her leg was paralyzed after treatment so she couldn't return to work. She can't see as well anymore or teach since her chemotherapy, so now my dad has to take care of the family. We have to save every penny to help my mom with her hospital fees and my brothers go through school. My brother is a third year student studying transportation and I am a first year medical student. Right now we are supporting the family because they aren't able to support themselves. Even though this is a difficult time, we are trying our best to finish school so we won't let our parents down and make them proud of us. This has been so uplifting and inspired me to continue working hard. I received 827,000 DONG. I am very thankful and truly appreciate you.

I wish you happiness and health, thank you again very much.

Ng Huynh Vu Ngan
